

FANTASTIC

A TV GAME WITH INBUILT PERSONAL COMPUTER!

OVER
5000
SOLD!

Cat Y 1600

& it's years ahead!

Yes — an absolutely up-to-date design. Most of the TV game consoles around were designed at least 2 years ago. And in electronics, that's an eternity!

Compare the quality

Amazing picture quality with over 49,000 dots — over twice as good as the largest selling TV game. You'll be amazed at the clarity, the detail — just like the screens NASA use in the space shuttle!

Space age Controllers

GREAT FEATURES —
GREAT PRICE!

Not just simple sticks: full space-age guiding devices with 48 keys as well. You get incredible control capability — far more than possible with other games. And slide-in overlays for controllers: you can see exactly what to do! When the controllers are placed in the console, they form a standard typewriter-style 'QWERTY' keyboard — that's versatility!

Fantastic game Cartridges

21st century games — like you've never played before. And every cartridge has many games — up to 32 in each! You'll never be satisfied with anything less after playing the WIZZARD.

Every cartridge has a built-in demonstration program to show you how to play the game. And plays music, too — it's that advanced!

NOW

AVAILABLE

Cassette
Storage
Module

Easy one plug connection to your Wizzard!
At last - now you can store your programs and retrieve them without re-keying! Quality cassette unit connects to side of Wizzard, one plug supplies power and signal lines.
