CARTRIDGE INSTRUCTIONS

You've taken on the toughest job of your career with

CREATIVISION's POLICE JUMP

You are a Police Inspector

The notorious criminal, Dangerous Dan, has kidnapped a beautiful rich girl and you've tracked him down to his sky-scraper hideaway, but that's the easy part. Now you have to go up there, all by yourself and get him. There are twenty floors between you and your goal, every one of them filled with treacherous booby traps

The first 5 floors.

Your first goal is to climb up the first 5 floors. Dangerous Dan lurks at the top, throwing tires down the catwalk, and unless you can jump over them, it's game over for you!

The next 10 floors

Still under construction, the next 10 floors consist of only narrow beams and moving elevators. You have to jump from beam to beam and along with watching out for your footing, you have to keep an eye out for the killer whirlwinds that blow through the open structure.

The last 5 floors

You're nearly there, but the chase gets more complicated now. The only way to get Dangerous Dan is to make sure he doesn't sneak by you and get away. So you have to knock out all the connections between the catwalks as you climb. Just walking over them will make them disappear, but be careful! When you try and walk back the same way, you may fall down the hole you've made. Not only that, but the winds are much stronger here, and can easily blow you away.

But if you do manage to climb all the way from the bottom to the top and take out all the connection, you've captured Dangerous Dan, freed the beautiful girl and the world is safe again!

Watch out, though. If you fall three times, its game over for you!

Tips from Police manual

Many inspectors have tried to capture Dangerous Dan, and many have failed. But they did not die in vain. They contributed valuable information which may help the successful Police Inspector.

Leaping: On the lower floors, you will find it much easier to leap while your inspector is on the run. He can cover much more ground, and can actually leap right over two tires in a row.

Hiding: On the lower floors there are piles of construction materials scattered around on the floors. Although you cannot climb them right up to the next floor, you can climb up high enough to avoid being hit by tires. But be careful. Tires often fall right down on top of you from the floor above, so don't stay there too long.
