## HOW TO LOAD AND RUN YOUR TAPE PROGRAMME

1. You may use any type of cassette tape player/recorder. With your Computer you will find a connection cord which has one stereo plug on one end and two mono plugs on the other end. Connect the red mono plug to the EAR socket of your tape player.
2. Connect the black mono plug to the MIC socket of your tape player.
3. Connect the stereo plug to the TAPE socket of your Computer.
4. Turn the VOLUME CONTROL of your tape player to about 3/4 of maximum. Or use the setting which you have found to be most reliable for programme loading.
5. Insert cassette into tape player and REWIND.
6. Type CRUN on your computer keyboard and terminate by a RETRUN key.
7. Press the PLAY button on your cassette tape player.
8. Wait until your programme has been loaded into your computer.
9. Have fun!

## **3-6-9**

3-6-9 is actually three games in one. When you choose the game of 3, the playing board is a 3 by 3 grid. The game of 6 is a 6 by 6 grid. The game of 9 is a 9 by 9 grid.

You play the computer in all three games. Every move fills an empty square. The point of the game is to complete full vertical or horizontal lines on the grid. The player who fills the last square on the line wins the line and gets another turn.

The game ends when the playing board is all filled. Be careful, the computer is sneaky and loves to win. Think carefully when you are given the choice of moving first. And good luck.
