HANG MAN

95-0131-12

WRONG

HANG MAN

HOW TO LOAD AND RUN YOUR TAPE PROGRAMME

1. You may use any type of cassette tape player/recorder. With your Computer you will find a connection cord which has one stereo plug on one end and two mono plugs on the other end. Connect the red mono plug to the EAR socket of your tape player.

2. Connect the black mono plug to the MIC socket of your tape player.

3. Connect the stereo plug to the TAPE socket of your Computer.

4. Turn the VOLUME CONTROL of your tape player to about 3/4 of maximum. Or use the se setting which you have found to be most reliable for programme loading.

5. Insert cassette into tape player and REWIND.

6. Type CRUN on your computer keyboard and terminate by a RETRUN key.

7. Press the PLAY button on your cassette tape player.

8. Wait until your programme has been loaded into your computer.

9. Have fun!

HANG MAN

One of the words most popular games, HANGMAN is not only fun, but educational too. Players have to guess the letters of an unknown ENGLISH word which can have up to 8 letters.

When a player guesses a letter, if that letter is in the mystery word, it will appear in the appropriate place on the screen. Then the player who guessed right gets another chance. And because the correct letters are displayed, it's easier to guess what the other letters might be.

But when a player guesses wrong . . . look out! . . . Part of a human figure will appear at the end of the hanging rope. And when the entire figure appears there, the player is hung and has lost the game.

An ideal way to brush up on English spelling for children and students of all ages.

INSTRUCTIONS

Type in one letter when prompted.
