

RAMESES CASSETTE DRIVE

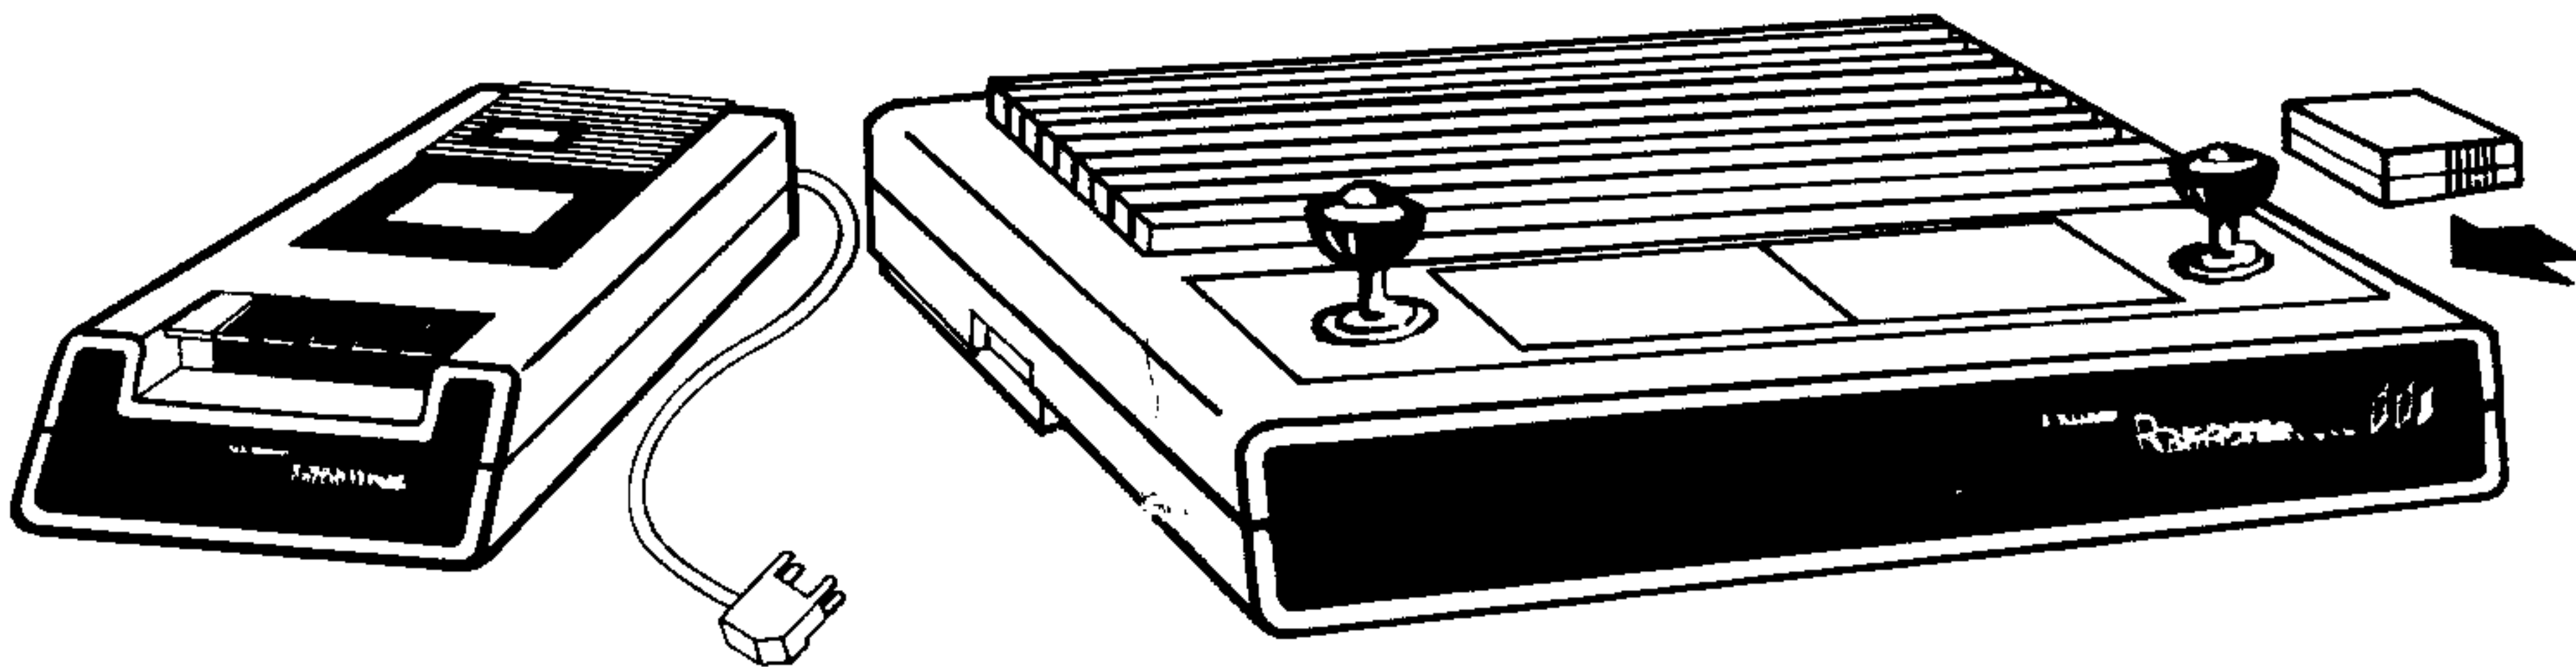

**FOR USE WITH HANIMEX HVC 6502
RAMESES PERSONAL COMPUTER**

A RAMESES VI BASIC INTERPRETER CARTRIDGE is necessary, plugged into the right-hand console port, before this unit will function as a bulk storage device & "RECORD" or "PLAY" (CSAVE or CLOAD) computer programmes. This cassette drive derives its operating power from the RAMESES console, and cannot be used as an audio-type cassette recorder.

Now that you have your Rameses cassette drive you can further expand your computer system by using this drive in conjunction with the console and the basic interpreter cartridge. This allows you to load and save programs into or from the computer. By recording a program on a tape you can save it as a permanent record. Later you can load the program from the cassette tape into the computer's memory if you want to use that program again.

THE CASSETTE DRIVE IS CONNECTED TO THE COMPUTER SYSTEM BY A CASSETTE INTERFACE CABLE, AS SHOWN IN THE FIG.

TO SAVE AND LOAD PROGRAMS INTO OR FROM A CASSETTE TAPE, THE FOLLOWING STEPS SHOULD BE FOLLOWED:

1. Insert the basic interpreter cartridge in the right-hand port.
2. Connect the cassette drive with the computer console by the cable. (Be sure that the plug has the cable exiting at rear).
3. Switch on (after checking your TV set connection).

TO RECORD: (CSAVE)

- A) Put a good quality tape cassette in place, to record. (Csave command.)
- B) Reset the drive counter to zero.

- C) Compose and prove the program.
- D) Press the "play" and "record" button on the drive to select the "record" (Csave) mode, then when you type "Csave" (hit ret'n), the drive will record the program. (See the basic interpreter operating manual for further instructions.)

TO PLAY: (CLOAD)

- A) Put a program cassette in place, wind to the required index number for the start of the program needed (by pressing fast forward or rewind key on the drive). Then press play.
- B) Then when you type "cload" (hit ret'n), the drive will load the program into Rameses memory banks. (See the basic interpreter operating manual for further instructions.)

NOTE:

The operating manual lists the "crun" command. This command (give a line no. in a programme) Restarts the drive and allows further data to be loaded when the preceding program has run to completion. The demonstration tape that you now have has a number of crun in it. Watch (or list) the program on the screen, and you'll see how to use this command in your own programs. Also, if a crun command is in a program, but the necessary data to complete that program has not been input from the keyboard, and you want to go to the next program on the tape, then you can still use cload to restart the drive and load that next program. Try it!

Always refer to the operating manual, practice examples from it, make sure that what you have done is correct. You will very quickly overcome any initial problems in understanding computer programming. Its a lot of fun.

Happy computing!

INTERNATIONAL LIMITED WARRANTY

MODEL: HVC 6502

This product is warranted to be free from defects in workmanship and materials for a period of 6 months from the date of purchase. If repairs are necessary during this period, because of any such defects, then at our option the product will be either repaired or replaced free of charge with an equivalent product. SATISFACTORY PROOF OF THE PURCHASE DATE MUST BE FURNISHED AT THE TIME OF NOTIFICATION OF THE DEFECT FOR ANY CLAIM UNDER THIS WARRANTY TO BE ENFORCEABLE.

This warranty will become invalid if the product has been subjected to modifications, abuse, improper treatment and/or if any defect is caused by repairs made by any unauthorised person. There are no warranties express or implied except for those which are stipulated herein and those which are implied and cannot be excluded in law provided that in those countries and states where it is possible to limit the implied warranties of merchantability and of fitness for a particular purpose to the duration of this warranty they shall be regarded as being so limited.

This warranty does not cover batteries, damage caused by batteries, film, damage to film, lamps, flashlamps or flashbulbs, where applicable. FURTHERMORE, INCIDENTAL AND CONSEQUENTIAL DAMAGES OF ALL KINDS WHATSOEVER ARE EXCLUDED IF AND TO THE EXTENT TO WHICH IT IS POSSIBLE TO DO SO IN LAW.

Returns must not contain batteries, should be properly packaged, and prepaid to your nearest Hanimex branch or alternatively through your dealer.

This warranty gives you specific legal rights and you may have additional rights and remedies which either cannot be excluded or limited in law or which have not been excluded or limited by the terms of this warranty and which may vary from state to state and from country to country as, for instance, some states in the United States of America do not allow exclusion or limitation of incidental or consequential damages and in France this warranty cannot preclude the operation of article 1641 and other articles of the French Civil Code in relation to latent defects.
